SUMMARY

Software Engineer and Computer Engineering student at the German Jordanian University, focused on full-stack product engineering, system design, and secure AI-assisted development. Experienced in leading the full product lifecycle, from customer discovery and architecture design to backend development, database engineering, testing, and deployment.

Founder & CTO of DineLink, winner of Falling Walls Jordan 2025 and selected among the **Top 100 global innovators** at the Falling Walls Foundation in Berlin. Also building **VibeSafe, an open-source VS Code extension and CLI tool** that helps developers detect security and deployment risks in AI-built applications.

SKILLS

Main Technical Focus

- **Product & System Design:** product discovery, customer interviews, requirement analysis, MVP scoping, feature prioritization, technical roadmapping, system architecture, backend architecture, database design, relational data modeling, API design, API integration, and full-stack architecture.
- **Full-Stack Web Development:** Next.js, React.js, TypeScript, JavaScript, Node.js, NestJS, FastAPI, REST APIs, PostgreSQL, MySQL, Supabase, authentication flows, backend validation, front-end/back-end communication, real-time data handling, dashboard development, responsive UI development, and end-to-end web application delivery.
- **Developer Tools & Secure Development:** VS Code Extension API, CLI development, TypeScript monorepos, static analysis, rule-based security detectors, secret scanning, frontend key exposure detection, secure endpoint awareness, environment-variable safety, authentication/authorization awareness, input validation awareness, and open-source workflows.
- **AI-Assisted Engineering:** using LLMs and AI coding tools for prototyping, debugging, refactoring, documentation, architecture exploration, and faster product iteration.

Applied Technical Knowledge

- **AI, ML & Data:** machine learning applications, SVM classification, feature extraction, FFT analysis, filtering, window segmentation, normalization, signal processing pipelines, IMU sensor-data processing, activity recognition, ML model integration, MediaPipe, OpenCV, real-time landmark detection, and real-time prediction dashboards.
- **DevOps & Deployment:** Git/GitHub, GitHub Actions, Docker, Netlify, AWS, Hetzner, Linux, CI/CD pipeline management, production deployment workflows, cloud deployment basics, npm package publishing, VS Code Marketplace publishing, and Open VSX publishing.
- **Networking & Systems:** HTTP/HTTPS, DNS, TCP, UDP, WebSockets, foundational network architecture, Linux basics, and distributed systems communication.

Programming & CS Foundations

- **Languages:** TypeScript, JavaScript, Python, Java, C, C++, SQL, and x86 Assembly.
- **Fundamentals:** Object-Oriented Programming, Data Structures, Algorithms, clean code principles, modular architecture, testing, debugging, and software design patterns.

Working Knowledge

- Kubernetes basics, Vue.js, Vite, Oracle APEX, CI/CD optimization, containerization concepts, cloud infrastructure basics, cybersecurity testing fundamentals, and German B1.

EXPERIENCE

DineLink | Founder & CTO | Feb 2025 – Present | [DineLink](#) | [GIU Feature](#) | [TTi Feature](#)

- Founded and led the development of DineLink, an AI-powered restaurant management platform designed to help restaurants improve operations, decision-making, and efficiency.
- Conducted customer discovery interviews with **15+ local restaurant owners** to validate real business pain points and define the platform's core features.
- Designed the product roadmap, **system architecture**, and early prototype, leading the full lifecycle from market validation to technical execution.
- Built and presented the prototype that won **1st place at Falling Walls Jordan 2025 among 50+ competing innovators**.
- Represented Jordan at the Falling Walls Global Finals in Berlin, selected among **the Top 100 global innovators from 2,700+ applicants worldwide**.

Falling Walls Foundation | Ambassador – Jordan | Apr 2026 – Present |

- Invited to speak during the **Amman and Ramallah events**, sharing personal experience as a previous Falling Walls winner and global finalist.
- **Mentoring participants** during the program by providing guidance on pitching, idea development, and innovation presentation.

Freelance Full-Stack Developer | Feb 2025 – Present |

- Delivered **9+ full-stack web applications** for small business clients, translating unclear business requirements into production-ready systems with responsive interfaces, backend APIs, databases, and deployment workflows.
- Designed project architectures, database schemas, API flows, admin dashboards, and authentication/user-management logic based on each client's operational needs.
- Managed the full delivery lifecycle from discovery calls, UI planning, and feature scoping to implementation, testing, deployment, client handover, and post-launch iteration.
- Built and deployed client platforms using React, Next.js, Node.js, NestJS, PostgreSQL, Supabase, Tailwind CSS, Netlify, AWS, and GitHub-based workflows.

GDG Amman | *Technical Director* | Aug 2025 – Present |

- Co-organizing technical workshops and hackathons for a community of 3,000+ members in the Amman tech ecosystem.
- Engaging in community-driven projects to promote modern web and AI technologies.

AgentX | Software Engineer | Nov 2025 – Feb 2026 | [Agentx](#)

- Built the official website for a Jordan-based startup using React.js and Tailwind CSS.
- Delivered a responsive, production-ready UI aligned with business requirements.

TEDx Tabarbour | *Front-End Developer* | Sep 2025 – Feb 2026 | [TedxTabarbour](#)

- Building the official event platform using React and CSS to serve an expected audience of 500+ attendees.
- Implemented automated CI/CD pipelines using GitHub Actions, reducing manual deployment time by 10 minutes per build.

TEDxGJU — Full-Stack Developer & Technical Support | Nov 2025 (Two Weeks) |

- Developed a custom ticketing system that successfully processed more than **150 registrations** in a high-traffic environment.
- Provided real-time technical troubleshooting for check-in systems, ensuring **zero delays** during the event entry phase.

EDUCATION

German Jordanian University (GJU) – B.Sc. Computer Engineering; 2023 – present

- Actively involved in innovation, entrepreneurship, and national competitions.

PROJECTS

Eltizamati – Fintech Mobile Application | Product & Technical Lead | July 2026 | [GitHub](#)

- Led the project from initial idea to working product, owning product design, system architecture, technical planning, and implementation.
- Built a bilingual React Native and TypeScript application with clean architecture, Supabase, secure financial-data handling, offline demo mode, and a decimal-safe financial engine.
- Delivered features for tracking loans, Murabaha financing, and credit cards, helping the team secure 5th place at the Rally Fintech Hackathon.

VibeSafe – Open-Source Security Developer Tool | Founder & Maintainer | June 2026 | [GitHub](#) | [VS Code Marketplace](#)

- Built an open-source pre-deploy safety scanner for AI-built or “vibe-coded” applications, released as both a VS Code extension and CLI tool.
- Designed a TypeScript monorepo with a reusable scanner core, shared type system, CLI package, and VS Code extension package.
- Implemented **rule-based static analysis detectors** for hardcoded secrets, exposed frontend keys, missing authentication, missing validation, and insecure project configuration.
- **Published the tool through npm, VS Code Marketplace, and Open VSX**, with developer-focused repair plans, deploy-readiness scoring, and AI-ready fix prompts.

HydroSense Jordan – Team Leader & ML Developer | April 2026 – May 2026 | [Github](#)

- IoT-based water monitoring solution focused on cost-effective sensing, data processing, and real-time analysis.
- Designed a shared hub architecture to reduce hardware costs and improve scalability across multiple sensing units.
- Working on the machine learning model and signal processing pipeline to improve data interpretation, sensor reliability, and water-quality insight generation.

Haitham Haddad Barbershop Platform (In Progress) – Full-Stack Developer | 2026 | [Demo](#)

- Developing a full-stack appointment platform for a local barbershop in Jordan using Next.js and Tailwind CSS.
- Implementing backend logic with Next.js API routes and PostgreSQL for booking management and data persistence.

MedModelle E-Commerce – Full-Stack Developer | Mar 2026 – Apr 2026 | [medmodelle](#)

- Delivered a complete e-commerce website for a Jordan-based client, handling the full development lifecycle from frontend and backend implementation to database design and deployment.
- Built the platform using Next.js, NestJS, and PostgreSQL, including product management, database structure, API development, and production deployment.
- Managed the project end-to-end, translating client requirements into a functional, scalable, and production-ready online store.

Human Activity Recognition System – ML & Full-Stack Developer | 2026 | [Github](#)

- Built a full-stack Human Activity Recognition system that classifies human activities from accelerometer and gyroscope IMU sensor data using a trained SVM model.
- Implemented a FastAPI backend with a signal processing pipeline for filtering, window segmentation, feature extraction, normalization, and activity prediction.
- Developed a React and Tailwind CSS dashboard with drag-and-drop file upload, real-time analysis, confidence scores, FFT visualizations, and responsive results pages.

Driver Monitoring System | Python, MediaPipe, OpenCV Dec 2025 | [Github](#)

- Developed a real-time safety application using Python and MediaPipe to monitor driver alertness and prevent accidents by detecting fatigue and distraction.
- Implemented signal processing to track Eye Aspect Ratio (EAR), Mouth Aspect Ratio (MAR), and Head Pose Estimation for high-accuracy drowsiness and yawn detection.

OneSalt E-Commerce – Full-Stack Developer July-Aug 2025 | [Wearonesalt](#)

- Delivered a complete e-commerce website for a Jordan-based client, handling the full development lifecycle from frontend and backend implementation to database design and deployment.
- Built the platform using React.js, Node JS, and PostgreSQL, including product management, database structure, API development, and production deployment.
- Managed the project end-to-end, translating client requirements into a functional, scalable, and production-ready online store.

COMPETITIONS & ACHIEVEMENTS

- **Speaker & Finalist – Falling Walls Breakthrough of the Year (Berlin);** recognized as one of the top 100 global innovators selected from 2,750+ applicants across 60 countries. [link](#)
- **Speaker & University Representative – Eighth Arab Youth Conference;** nominated to present the success story of the **DineLink** startup and its international competition victory.
- **The youngest finalist at the Falling Walls Finals,** pitching the **DineLink** startup alongside international professors, PhD holders, and researchers.
- **Winner – Falling Walls Lab Jordan 2025 (DAAD);** secured **1st** place nationally to represent Jordan on the global stage in Berlin. [Link](#)
- **Winner – The Business Game (TTi);** received mentorship program with Ecoventure.
- **Finalist – National Technology Parade (HTU).**
- **Finalist – Queen Rania National Entrepreneurship Competition (PSUT);** completed 49 hours of mentorship training with QRCE.
- **Finalist – GJU 3030 Innovation Competition (GJU).**
- **Participant – Database Hero (HTU)**
- **Participant – AI Innovators Hackathon (UOP).**
- **Participant – Application Development Hackathon (GJU).**
- **Cyber Warriors Training, NCSC** – intensive cybersecurity training program.
- **Hands on Apex (GJU)** – Accelerated Web Application Development

CERTIFICATES

- **Oracle Apex** – GJU. 2025
- **Git & GitHub** – GJU IT Club. 2025
- **Front-End Development** – GJU IT Club. 2025
- **Object-Oriented Programming** – GJU. 2024
- **Code for Palestine** – Paltel. 2020
- **Problem Solving** – Paltel. 2020
- **C++ Programming** – Paltel. 2020

LANGUAGES

- Arabic (native)
- English (fluent, **C1 certified**)
- German (B1)
